

MALACHI ALUSA

WEB DEVELOPER

PROFILE

I am a talented Web Developer with a passion for new technology. I currently reside in Logan, Utah, and work as an Associate Developer for WETx, I also work as a QA Associate for Tecuity, Inc. I have a background in both testing and writing software. I am proficient in HTML, CSS, JavaScript, React, Node.js. I am also familiar with C#. Recently I have been using playwright to create automated testing for software used by Secretaries of State. I am exceptional at resolving complex problems and tackling difficult issues as part of a team. My goal is to drive creative solutions to real-world situations and produce feasible results. I am looking for a reputable company that I can grow with.

PROJECTS

2022 • **Malachi.Alusa.Me**

Portfolio

This is my current Portfolio. You will find information about me and an in depth look at my experience. There are also some links to past projects I have built during my time in school and applications I have worked on in my personal time.

Check it out here: www.malachi.alusa.me

2021 • **GIT IT DONE**

Git Hub API Application

This is an API application that allows users to look up any repository on Git hub and see issues they have on their projects. It also allows users to filter those issues by language. This app uses Git Hubs generous API to pull data directly from their site.

Check it out, try looking up "Blizzard", "Facebook", or "Microsoft"

You can use it here: <https://tonganknight.github.io/git-it-done/>

2021 • **LEFTOVERS**

Smart Food Application

I built this application to help users see required ingredients for recipes before going to a recipe site. This app executes API calls from a user search and returns results, which then allows users to organize favorites with drag and drop function.

Try it out here: <https://tonganknight.github.io/awesome-sauce/>

WORK EXPERIENCE

- Now**
2022
- **Associate Developer**
WetX | Salt Lake City, UT
- As a web developer I work with a team of developers to plan and create software development solutions regarding WetX mission to aid customers with finding and purchasing water rights. Some of my contributions include:
- Modify and change code written in Typescript, and JavaScript in a React framework using Minimal UI components.
 - Use an AWS stack for back-end development.
 - Create clean facing organized reusable code.
 - Meet weekly for Scrums, and meetings.
-
- Now**
2022
- **QA Associate**
Tecuity | 40 3800 N, Hyde Park, UT 84318
- As a QA associate I work with a team of developers and testers to provide testing for software use by Secretaries of State. Some of my contributions include:
- Run tests for user driven stories about bugs, desired features, and updates for websites and software.
 - Create automated regression tests using playwright.
 - Aid in manual regression tests in multiple environments for Secretary of State websites
 - Systematically break down and recreate software issues for testability.
 - Organize and maintain schedule in Azure environment.
-
- 2021**
2019
- **TEAM LEAD SALES/ Assistant Manager**
Balance of Nature | 1568 S River Rd #200, Saint George Utah
- As a team leader at Balance of Nature I was responsible for training, mentoring, and leading a team of sales agents. I was able to maximize team sales and profits, monitor, coach, and train team members in ever evolving sales tactics
- Coached and trained teams of sales agents, and maximized department income.
 - Tracked and analyzed team metrics to develop superior sales training.
 - Rehearse and train live customer scenarios to overcome customer objections.
-
- 2019**
2015
- **TEAM LEAD SUPERVISOR**
Caption Call | 555 South Bluff St. St. George UT 84770
- As a team lead, I was able to provide live captions for hearing impaired customers. I was responsible for coaching and training team members to better utilize speech recognition software and to maintain highly accurate captions.
- Developed individualized training programs to increase employee and team performance
 - Lead a team of over 27 Captioning Agents
 - Train and coach employees daily to better utilize company software, and provide superior customer service
